Stevinweg 1
2628 CN Delft
The Netherlands

Dear colleague,

we are very pleased to announce that the **7th International RILEM Conference on Cracking in Pavements** will be held in Delft, The Netherlands, on 20-22 June 2012, under the auspices of the RILEM Technical Committee 210.

The Cracking in Pavements Conferences are organized every 4 years. After the successful Conferences in 2004 in Limoges, France, and in 2008 in Chicago, USA, we have the honor of organizing this event at Delft University of Technology.

In previous years, these conferences have attracted 200-300 people from a combination of academia and international industry, active in the field of pavement engineering and pavement material research. The 7th International RILEM Conference on Cracking in Pavements provides your organization with a *unique opportunity* to showcase your products and services to the international pavement community.

The exhibit space will be located at the foyer of the Conference Centre in the middle of the TU Delft campus. The coffee breaks and most social gatherings will be organized at the foyer, giving thus plenty of interaction between the exhibitors and the conference participants.

The conference is also a tribute to the contributions of Prof. A.A.A. Molenaar to the pavement engineering field. He will have his academic retirement lecture in the closing session of the conference. For this event, additional guests will be invited who will also be encouraged to visit the exhibit space.

If you are unable to exhibit at the conference, various other sponsorship opportunities are available that will promote your company to the conference participants. Please find in the following page the exhibit and sponsorship details.

Please don't hesitate to contact us, if any additional information is needed!

Sincerely,

Dr. Tom Scarpas
Conference Chairmen

Dr. ir. Niki Kringos
Conference Secretary
