ISAP REPORTER

About ISAP

The International Society for Asphalt Pavements was formed in 1987 following the 6th International Conference on the Structural Design of Asphalt Pavements, held at the University of Michigan, Ann Arbor. The Asphalt Institute was a major ‘founding father’ for the society. The principal objective was to provide an organization, which could take responsibility for continuing this prestigious series of conferences. Hitherto, individuals on an ad hoc basis had done this.

Our newsletter!

We are very happy to share to all ISAP members and the technical community in asphalt pavements that we are starting our newsletter in order to share important information about the various activities we have and other important technical/research topics.

Board meeting!

On January 31st, our board met to discuss about a review of ISAP’s strategic plan as well details of ISAP’s Symposium Costa Rica 2022.

UPCOMING EVENTS

Short Course on Cold Recycling of Asphalt Pavements:

- Week-2 (February 2): Structural design and life cycle assessment (Eshan Dave)
 - Week-3 (February 9): Mix design (emulsion and foam and active filler) (Kim Jenkins)
 - Week-4 (February 16): Pavements and role of cold recycling in pavement structure (Gabriele Tebaldi)
 - Week-5 (February 23): Application and construction (Mayca Rubio and Kim Jenkins)
- Sponsored by: ISAP Technical Committees on Asphalt Pavement and Environment (APE) and Pavement Field Evaluation (PFE)

Newsletter

ISAP REPORTER

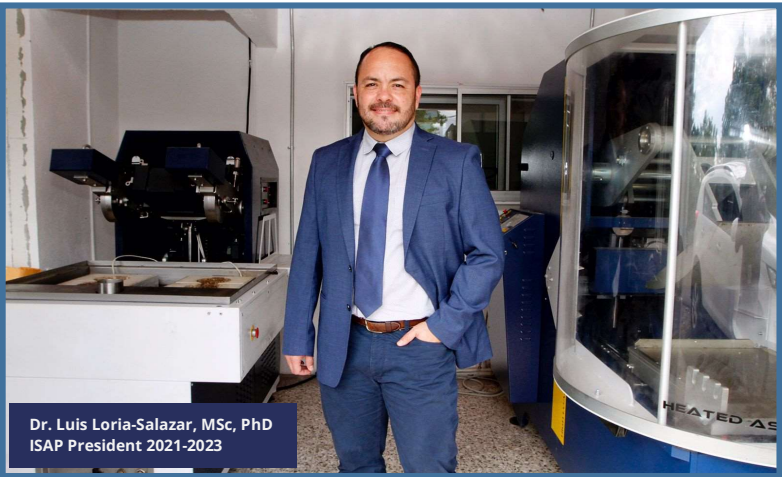

A word from our President Dr. Luis Loria-Salazar

At ISAP, we are delighted on developing our newsletter to communicate either our technical activities as well as the ones for other industry, technical or scientific groups. In addition, we are planning to include briefings of state-of-the-art research, what are the hot topics in the field, who are the leaders and more influential researchers around the world and; the latest technology advances.

Right now, amid the tough times that we have lived the last two years, there is still a lot of space for innovation and the search for new solutions in the asphalt pavements field. Asphalt has its language and culture. Our board member, Gerry Huber once said: Asphalt is the language of love! In fact, asphalt pavements play a major role in the world economy since most of the paved roads are made with this extraordinary material, and it is the smoother solution for providing a safe, comfortable and economic ride to the drivers.

This newsletter is intended also to provide inside into the more challenging research projects around the globe in the asphalt binders field and from that, to generate engagements into the various university and industry actors. This way, we will assure that the best of the asphalt knowledge in the world is well spread and applies to provide improvements in the quality of life and economy of the people and their countries. If this objective is reached, we will be more than served in developing it!

So, please look to our next newsletters and let us know your comments. We would love to be in touch with you!

Dr. Luis Loria-Salazar, MSc, PhD
ISAP President 2021-2023

UPCOMING EVENTS

Symposium

ISAP

Costa Rica, October 25-27, 2022

International Symposium of Asphalt Pavements
Simposio Internacional de Pavimentos Asfálticos

Sustainable asphalt pavements: a current challenge to define the future

More than 150 papers are expected to be orally presented or presented on exclusive poster sessions.

60 papers will be selected for full submission to special issues of major refereed journals (Road Materials and Pavement Design -RMPD- and ASTM Journal of Testing and Evaluation -JTE-)

Important Dates:

February 15 Extended Abstract submission deadline	February 28th Results of Extended Abstracts by	March 15th Submission of the final version of the Extended Abstracts by	April 30th For the papers selected for the journals evaluation - Submission deadline
September 15th Paper adjustments by	September 30th Final paper submission by		

Submit your extended abstract to:
